GEC-AEI JOURNAL

OF SCIENCE AND TECHNOLOGY

VOLUME 35, 1968

Published by: **THE GENERAL ELECTRIC COMPANY LIMITED OF ENGLAND**
Head Office : P.O. Box No. 120, 1 Stanhope Gate, London, W1Y 6AA
Correspondence to : The Editor, Hirst Research Centre, Wembley, Middlesex

INDEX

volume 35, 1968

Inclusive page numbers for the year's issues are:

No. 1 (March) ..... 1 to 44
No. 2 (July) ..... 45 to 92
No. 3 (November) ..... 93 to 140

PAGE

A

Advances in ferrite materials for microwave devices 94
Atmospheric attenuation of radio signals above 10 GHz 133

B

Buildings—Lighting in the environmental engineering of 137

C

Cathode-ray display tube—Two-colour 77
Circuit-breakers—Sulphur hexafluoride, in quantity production 32
Closed-circuit television equipment 33
Compact mercury-arc converter valves for d.c. power transmission 79
Compensator—First static, in service 17
Components for large steam turbines—Development of 107
Compressor drives in a fertilizer plant 121
Computer-aided design of microwave-radio links 132
Computer control of a cement kiln using CONRAD standard software 57
Crystals—Ultrasonic vibrations in quartz: direct observation by X-ray diffraction 87

D

Delay lines—Ultrasonics and spin waves in microwave 99
Design of microwave-radio links—Computer-aided 132
Development of components for large steam turbines 107
Drives—Reel, for high-performance rolling mills and metal processing 125

PAGE

E

Environmental engineering of buildings—Lighting in the 137
Exciters—Thyristor automatic regulators and static 3

F

Ferrite materials—Advances in, for microwave devices 94
Fertilizer plant—Compressor drives in a 121
First static compensator in service 17

G

Gas-turbine power plant in total-energy concepts—'Package' 122

H

High-mast lighting for public highways 19

I

I.D.M.T. relay—Solid-state, for power-system protection 15

L

Lighting—High-mast, for public highways 19
Lighting in the environmental engineering of buildings 137

PAGE

M

Magnetrons—Rugged pulsed 25
Mercury-arc converter valves for d.c. power transmission—Compact 79
Metal processing—Reel drives for high-performance rolling mills and 125
Microwave delay lines—Ultrasonics and spin waves in 99
Microwave devices—Advances in ferrite materials for 94
Microwave-radio links—Computer-aided design of 132

N

New printed-circuit table telephone 14

O

Overflow—Telephone-traffic, in trunk networks: equations of state and nomograms 69

P

'Package' gas-turbine power plant in total-energy concepts 122
Power-system protection—Solid-state I.D.M.T. relay for 15
Power system—Static voltage control for 330 kV 13
Power transmission, d.c.—Compact mercury-arc converter valves for 79
Precision-controlled thyristor power supplies for synchronous beam-line magnets 48
Printed-circuit table telephone—New 14
Pulsed magnetrons—Rugged 25

Q

Quartz crystals—Ultrasonic vibrations in: direct observation by X-ray diffraction 87

R

Radio signals above 10 GHz—Atmospheric attenuation of 133
Reel drives for high-performance rolling mills and metal processing 125
Regulators—Thyristor automatic, and static exciters 3
Rugged pulsed magnetrons 25

PAGE

S

Software, CONRAD standard—Computer control of a cement kiln using 57
Solid-state I.D.M.T. relay for power-system protection 15
Spectroscopy—Time-resolved 124
Spin-waves—Ultrasonics and, in microwave delay lines 99
Static compensator—First, in service 17
Static voltage control for 330 kV power system 13
Sulphur hexafluoride circuit-breakers in quantity production 32
Synchrotron beam-line magnets—Precision-controlled thyristor power supplies for 48
Synopses 44, 92, 140

T

Technical Literature 43, 91, 139
Telephone, table—New printed-circuit 15
Telephone-traffic overflow in trunk networks: equations of state and nomograms 69
Television equipment—Closed-circuit 33
Tests, static—Turbine-blade vibration: automatic charting of 117
Thyristor automatic regulators and static exciters 3
Thyristor power supplies—Precision-controlled, for synchrotron beam-line magnets 48
Time-resolved spectroscopy 124
Turbine-blade vibration: automatic charting of static tests 117
Turbine-generator for Winfrith Heath 67
Turbine-generators—1100 MW, for USA: £20 million contract 46
Turbines—Development of components for large steam 107
Two-colour cathode-ray display tube—A 77

U

Ultrasonics and spin waves in microwave delay lines 99
Ultrasonic vibrations in quartz crystals: direct observation by X-ray diffraction 87

V

Vibration—Turbine-blade: automatic charting of static tests 117
Voltage control—Static, for 330 kV power system 13

W

Winfrith Heath—Turbine-generator for 67

X

X-ray diffraction—Ultrasonic vibrations in quartz crystals: direct observation by 87
